WELCOME MESSAGE

Orthopaedic Trauma has evolved into a SuperSpeciality by itself with increased occurrence of high energy trauma causing complex fractures. Use of advanced imaging and specialised implants create an ever-evolving learning experience for trauma surgeons.

A course which caters to learning and teaching about complex periarticular fractures with Live Surgeries, Interactive case discussions, workshops will be of great value specially when crafted by top-notch trauma faculty from the country. The 17th Pune Trauma Operative Course [PTOC] aims to fulfil this dream and more.

PTOC was started by Sancheti Institute in 2006 as the basic fracture fixation course and has continued to evolve since then. Because of the pandemic, since last 2 years PTOC was not organised. So this year we have planned PTOC to be a landmark event with maximum focus on Surgical techniques and Live Surgeries. The entire program is structured to give an in-depth view of the surgical principles and discussions. The main theme of PTOC is Periarticular fracture with highlights on Tips, Tricks, Traps & Techniques covering major periarticular fractures.

We will also have accompanying Master Classes with interactive case discussion addressing the major controversies in complex fractures. We have 12 intensive Capsule Learning (ICL) modules on focussed on individual fractures as well as Keynotes talks on specific problem areas by experienced orthopaedic trauma faculty. We will also have Live hands-on demonstration workshops on latest fracture fixation techniques and Industry session introducing cutting edge innovations and implants.

PTOC 2023 will be held at the JW Marriott Hotel Pune with an excellent ambience, stay facilities and food. We have negotiated value for money special packages. Pune as an academic destination has been unmatched and we are committed to put forward the best academic program for our delegates.

We look forward to welcoming you all for this amazing event. Please register at the earliest.
